

# Who actually claimed that senior care and digitalization 4.0 do not fit together?

With the automation of financial processes and the use of intelligent business analytics tools, you always receive relevant financial key figures to control your care operations.

We love people  
We love care  
We love digitalization

### We live digitalization for you

- » Industry standard KPIs with benchmarking
- » Care rate reports for realistic yields
- » Automated projections
- » Operating result analysis at the push of a button

Especially in hectic times like these, people are the center of attention. The world of numbers should therefore provide unagitated and automated control-relevant information of your care facilities.

### Relaxed negotiations of care rates

We support your care rate negotiations with structured reports as a basis – while always keeping track of current regulations.

### Precisely digitized with PKF Care

PKF Care offers an intelligent solution that will save you valuable time. With simple financial processes based on the reliable financial software LucaNet, we also provide you with precisely fitting tools.

### Customized reporting

We facilitate the monthly reporting of relevant key figures with budget, forecast and actual comparisons including projections with concise graphics and figures.

### Valid economic planning

Together we face the challenges of the future by providing valid economic planning with integrated liquidity development.
